

Baton Simulations awarded Public Sector Simulation Scenario Contract

Montreal, QC, Canada – July 13th - Baton Simulations is proud to announce it was awarded a contract, through the Build in Canada Innovation Program (<https://www.tpsgc-pwgsc.gc.ca/app-acq/picc-bcip/index-eng.html>), to configure a version of ERPsim Online for SAP S/4HANA™. This new solution will be tested and used by various Government of Canada departments, under the coordination of the Financial Management Transformation Program, Office of the Comptroller General, Treasury Board of Canada Secretariat.

ERPsim is used worldwide to maximize the potential of SAP. Through non-stop action and real-life interactivity, users demystify SAP, experience real-time integration and acquire system and process skills in a fun and engaging manner. The new ERPsim Public Sector scenario will center on activities common to all public administrations, such as Funds Management, Budgeting, Procurement, Real-Time Analytics and collaboration across government-wide processes.

The solution is slated for Q4 2018 and will be suitable for all Public Sector or Defence organizations.

About Baton Simulations

Baton Simulations helps organizations fuel their digital transformation by engineering software solutions that are beautifully designed, effective and simple to use.

Thousands of people across the globe use our software solution, ERPsim™, to help organizations make informed software decisions, improve user adoption and engagement, increase understanding of business process and improve cross-silo communication.

In our continuous effort to improve enterprises system adoption and on-the-job performance, we have developed a rich, flexible cloud-based SaaS solution named Digital Adoption Solution or DAS. DAS integrates tightly with SAP Fiori and provides users with a suite of tools to improve their experience with SAP's latest enterprise software, on premise and in the cloud.

The R&D team at Baton is currently working on adding artificial intelligence capabilities to its products, taking advantage of the SAP Leonardo digital innovation system. Baton is a member of the Scale-AI Industry Super Cluster.

Through our academic partner, the ERPsim Lab at HEC Montreal, over 200 universities around the world use ERPsim at the graduate and undergraduate levels.
